After entry of the amendments made herein, the claim under consideration in this application will read as follows.

E14 34. A method of suppressing the inhibition of neuronal axon growth, the method comprising delivering *Clostridium botulinum* ADP-ribosyl transferase directly at a central nervous system (CNS) lesion site in a patient or a peripheral nervous system (PNS) lesion site in a patient, wherein the *Clostridium botulinum* ADP-ribosyl transferase is delivered in an amount effective to suppress inhibition of neuronal axon growth. --
